GOLD SEEKERS WRATHY.

A Vessel With a Large Pasaenger
List Libeled.

SEATTLE, Wash., August 17. — The
steamer Humboldt, which was to sail
today for St. Michaels, Aleeka, with 225
passengers and 400 tons of freight,
destined for Dawson City, is in the
liands of a United States deputy mershal.
When the boat was about to sail today
tile passengers discovered that a large
amount of their freight was to be left on
the dock. They were very angry and
theld a mass meeting. Mayor Wood of
Seattle, who is manuger of the boat,
was called upon to explain and he
promised that those who left previsions
would be properly cared for, and that
the goods would be shipped on the next
boat. This did not suit the crowd,
which demanded a guarantee. Arthur
Seymour of Haverhill, Mass., made a
speech demanding that the rights of
those who had paid for tickets and
freight be conserved. Incidentally be
said that he supposed there were those
in the crowd who would like to hau
the mayor. His words had an explosive
effect, but he managed to secure order
and a committee was appointed to adjust mattern. At this point it was ennonneed that John Galivan of Spoksne
had libeled the steamer. Matters bid
fair to be settled so the Humboldt will
get away tomorrow morning.

THE MINERS' STRIKE

WIVES AND DAUGHTERS OF THE STRIKERS WILL MARCH.

The Leaders Think the Injunction is Not Operative Against

Women.

Pittsanua, August 17 .- The comtem on the work which the men have been njoined from doing. It is the intention

will be.

A new element is to be introduced in the situation at an early date. The firmers of the entire country surrounding the several camps are making extensive proparations for a demonstration to show their sympathy for the strikers. They propose to have a parade headed by a band march down the Santisburg and up over the hills.

About 600 strikers from Thom's Run. accompanied by 150 woman and children, marched to Camp Victory near Canomatory today. They will remain at the camp until Saturday, when a meeting will be held.

Suits and counter suits promise to be one of the most prominent features of the coal miners' strike. While the New York and Cleveland Gas Coal Company has been prosecuting its injunction can, the miners have been gathering material on which to helds suits, not slone for wages, but for trespens.

It Will Be Fully a Month Before Work Can Be Resumed in the Shaft.

San Francisco, August 17.—A specia to the *Chronicia* from Augele Camp says For the second time within a little over two years the Utics mine, the mos famous gold producing mine on the mother lode, caught fire today. The first thought of all was for the night shift, which was at work when the blaze was discovered spreading from the of

caped early, and no one had been in the least injured.

The first intimation that anything The first intimation that anything was wrony came from a car man who was passing station No. 4 on the 300 foot level at 4 p.m. The whole woodwork was on fire. He attempted to beat it out with his jacket, but soon found it was useless, as a large cask of oil was in flames. The men in the Stickle shale were notified at once, and were hoisted to the top. One of their number had been to thoestation only fitteen minutes before to fill his lamp and is eugposed to have set fire to something in close proximity to the oil tank.

All of the men in other sections of the mine were taken out and pluced at work bulkheading the two dritts in the Stickle. One runs from the north and the other from the cooth, and connects the Utics with the Stickle basit. With these closed up water tight the hydranic monitors were put to work throwing water into the shaft on fire. For four hours thousands of pallons of water poured into the mine, while the hopes of the miners that it would be extinguished epecility fell.

At 8 o'clock the water was shu of and all openings closed air tight, in the hope time the first would be smethered without further trouble, but no one is capable of saying at this time whether or not the work has been successful. Tomorrow alternoon the shaft will be opened and men end thown to learn just what has been necompilehed.

Should there he no fire tomorrow when the miners go below to investigate the numps will be put to work removing the water in the mine. The miners estimate that tit will be fully a month before work will be resumed in this clastic evon if the first attack on the line has proved ancessful.

INVASION BY MINERS.

General Bradley Arrested and Placed in Juli.

Hibbsono, Ill., August 17.—Six hun-dred striking coal miners, eight abresst, invaded Coffeen at 3.30 this afternoon, throwing aside the deputy shoriffs doin guard duty and going through the town pell mell. The officials ordered the guards not to choot, but they began making arrests as far as possible. General Bradley was the first men placed under arrest, and three guards came to this city with him as last as horses could travel. He is now in the county jail. Other prisoners are on the way here. No shots were fired and no blond was shed. The invesion was far the purpose of inducing the men at work in the mine there to quit work and join the strikers. The sherlif will increase his force of deputies and the invadera will be compalled to leave the town or there will be a condict. uard duty and going through the town

THE PAY OF MINERS.

The official report of the Ohio mine inspector shows that the condition of the miners in that state is better than that of the workers in mines lu some of the states, but it is not good ecough to give tauch cheer to the person who still holds to the old theory that the labore is worthy of his hire.

According to the report there are 17,220 miners with the pick in Ohio, and their average daily wage to \$1.47. A limited number of machino operators rectave \$3,45 a day, while assistants on the machines receive \$1.80. But the 'spick' mirers constitute more than four-filths of the mine employes, and their wage is practically the miners'

V la hove said that this average wage is \$ 1.87, but the mere statement does no t give an adequate nor just idea of the si teation, for the miners are not given work all, nor one half, of the time. Last war the average carnings of the "pick" miners was \$221.55, instead of \$460.11, it would have amounted to had which it would have smounted to had employment been regular at \$1.47 a day. They actually received \$4.25 a week, or 71 cantes day. They receive \$1.47 a day, but they are permitted to rk an average of only 150 days in the

On actual wages of \$221.55 a year, or \$18.468 month, then, these miners live. On this amount they must feed and clothe themselves and minister to the wants of their physical, mental and epiritual natures. With the balance they can go to the theater. But the worst of it has not been considered. Thousands of these men are husbands and fathers, as they have a right to be if nature's laws are to count for any-thing. On \$18.46 a mouth, then, they are to feed, ciothe and care for not only children as well. Nobody need he told that such an effort must, end in the failure of semi-starvation. Possibly the animal may live and be clothed and eoul within it will dwindle on such

They are a bostial lot, many of these miners, and a majority of them should not be in this country, but, brought or tors, as they were, they are entitled to s liging chance and fair play at the hands of their masters. A churl may have the right on his side, and he has it when bese miners sak a sufficient increase of wages to permit them to live. This republic cannot afford to have within it a class of citizens who receive an average of 71 cents a day for their labor. Such wages tend to drag down all wages; they ninimize the price of labor and place . discount upon it. There is no citizen
who most toil in some way who has not
a living interest in seeing the miners escure desant wages for thomselves. If
they can be held in wage slavery, so can enother class, and another, until the unfortunate and is reached.

The Democratic platform se con-structed in Maryland the other day

says:

We note with satisfaction that the demand of more than 6,500,000 of Democratic voters, expressed at the polle has Knovember, has compolled Precident McKinley and a Republican congress to argu upon the powers, through the medium of a duly appointed committee, the necessity for an international conference to arrange the terms of a bimetallic system, under the operation of which both gold and silver shall be used and recognized as money of final redemption.

This is all right as an indorsement of the Republican policy of international bimetallism, but it is rather cold confort to the wing of the party which insiste that bimetallism by agreement is a fraud and delusion, and that there is no other way under heaven except for this country to coin silver at the ratio of 16 to 1, regardless of the results and independent of other nations. The silver wedge has entered all parties, but it has reached the vitals of the Dam-

Ir looks very much as if some of the newspapers would succeed in working up a rush of gold-seekers to Trinity county. And, when one pauses to con-sider the matter, one must realize that if there he such a rush it will be strictly an article of newspaper manufacture, For there is absolutely no basis for an excitement outside of the fact that two worth of gold in it. And this is no basis, for such pockets, of warying richness, have been lound over since gold first was discovered in California, and it is known that the discovery of one does not demonstrate that others will be found. There is gold in Freene county. Let him who wants it go out and find it if he can. As one swallow does not prove that spring has come, so one pocket does not prove that surrounding mountains are veined with gold.

RANDOM REMARKS.

You are outle right, young man; the inditidual who works for something in this world may never get it; but, on the contrary, he who works for nothing is dead certain to get it. So take your choice.

The Union-Herald, a religious paper which has been established at Thlars, hes adopted this moto: "In essential, unity; in non-essentials, liberty; in all things, charity." Tossibly charity may as of old, cover it all, but if it should not, what a nearry row there might be over the question what is essential and what is mon-essential. Over just that question the religious world has worried ever since man began to theorize concerning what he is and

It is too late, too late! If only the heroic Mrs. Smith had started in with this noble purpose before our Grover first was elected to the presidency, the nation might have been eaved from no much suffering. Defeated once, he never would have been elected. But now it is too late; she has begun too long afterwards.

Oncerting the simal between Prince Henri of Orleans and the Count of Turin, a Paris dispatch says:

"It now transpires that the French government kept a careful watch upon the principals and econds from the moment of their arrival, with the idea of interfering at a critical hour."

If they had a right to interfere it was because the French iaw—with which I man not acquainted—was on their side, and, granting that it was, is the informers justifiable that France has a class of sitzens (or a single citizen) who are greater than law? To the common red-blooded observer at this distance, it appears that Frenchmen, instead of being mad with enthusiasm for either of the princely awordsmen, should be engaged in an attempt to bring the would-be murderer to justice. If Jacques and Jean participate in a squabble, with portage as much of "honor" behind it as there was in this event bay to the collection and I should fine the law of walleries and If blood fines the law of the parties and If blood fines the law of the content of the co perhaps as much of "honor" behind it as there was in this eward play to the galleries, and if blood flowe, the law at once is active and Jacques and Jean are arrected and thrown into jail. Why should there not be one law for red blood and bine blood? Why should Jacques be imprisoned and Henri he lonized for similar things? France will never be what she claims to be, a government of, by and for the puople, until the las one law and one administration of justice for all man.

Of the efficier of physic Queen Elizabeth had adways been skeplical. New,
10 or 12 physicians came to the palace,
each promising, "with all manner of
assucration," "her perfect and easy
recovery" if she would follow a simple
course of treatment. But they spoke in
vain. Nor could the protests of examplitors, divines and waiting women induce
her to accept medical assistance. Her

Her condition inderwent no change, Granually those about her realized that "she might live if she would use means," but that she would not be persuaded, and princes, as they tearfully acknowledged, cannot be conced. Nevertheless, until the third week they looked forward to a renewal of her lethingr. But during the week it was perceived that the ground she had lost could only be recovered by miracle. On Wednesday, March 28, her comcilers entired her bedchumber to receive ley last instructions. She had none to

ier last instructions. She her last instructions. She had note to give. The archibishop and bishups offered up prayer at her bedside and she derived some context from their ministrations. In the evening she senk into a quiet sleep, such as she had sought without uvail for nearly a month. She never woke again. "About 3 o'clock in the morning of March 24 she departed this life, mildly like a lamb, easily like a ripe apple from the tree." When she was examined after death, her physicians reported that "she had a body of ilim and perfect constitution, likely to have lived many years." Death was, in fact, prepared to the last to bargain with her for a few more years of life, but his terms implied an enfectbenent of those faculties on whose unrestricted exercise her queenly fano secued to her to depend. By refusing to be party to the truce she invited her overthrow, but she mever acknowledged herself vanquished. The "Republican" Team Will Be

Strengthened.

The number of teams remaining in

the Examiner base ball tournament is steadily growing smaller. At the pres-ent time there are only fourteen teams

left and over one-half of that numbe

have been defeated twice. The only nine that has not lost a game is the Re-

This evening the members of the Re-CELICANS will hald an important busi-rees meeting, the outcome of which is being looked for ward to with much inter-est. It is bulieved that arrangements will be made for the signing of some new players who are recommended as heliur in the first class. It is also prob-able that Joe McGatthy will be rein-stated in the fram.

shie that doe McCarthy will be rela-stated in the tans.

It is an unwarnished fact that the team in its present condition is unable to cope successfully with such lessue as the kellance and Santa Orns, but the present condition of affairs will be of short duration. The team will be strengtheued in all of its weak points and will be in better condition than it has ever been in before the next tourna-ment game.

A Case of Doubles.

A Case of Doubles.

A remarkable case of "doubles" was found in Freamy sesterday in R. A. Hamilton, an old time resident of Arlington Heights, and R. A. Hamilton, voternary sorgeon of this city. To say nothing of the identity of name, and the natural mixup of mail matter which thereby results, the queerest feature of this concedy of errors is the fact that their signatures are so nearly identical that none but an expert can distilucion them. They are now discussing the proposition of either going into partnership or else to pose as terns, though the nearcst common relative they can trace to one Adem who failed in the gardening business several contures ago and mails a recoil thereby. day morning at 7 a.m., when the Second and Sixth regiments arrived on special trains.

A DEPOT PARK.

LOCAL ENTERPRISE THAT IS DE-MANDED.

Great Improvement That May Be Made at Very Small Ехрепве.

The establishment erected opposit the Southern Pacific depot by the For syth Seeded Raisin Company has don much for the improvement of the local surroundings of the Southern Pacific depot, in that it abits of the view of Chinatown, which was not only dis-agreeable in its impression but also misleading to the travoler as to the character of the city.

Enaracter of the city.

Some years ago an effort was made by
the people connected with the local
newspapers to sacure an improvement
of the surroundings of the depot and to

probability review the regimental dress parade.

The Sixth regiment drum corps, in their pretty full dress uniforms, are making a decided hit, and are having a fine time.

The present Sixth regimental band is reputed to be the best band the regiment has over taken into camp. It consisted twenty-three men, including the drum major. major.
There are about 1000 men in camp, alt told. The Troubadour Club is spending a picasant summer at Capitola.

the people connected with the local nawapapers to secure an improvement of the surrounding of the depot and to change the surrounding of the depot and to change the surrounding of the depot and to change the beautiful and article in its ansurand at the same time to index the practice of the county. It tank three or four years to educate public sentiment up to the noint of action, but the result was the charming little park which is the pride of the town and the admiration of all visitors. It bespeak enterprise and good taste and at the same time impresses visitors with the pushlittles and wonderful productiveness of this locality.

Now there is other work of the same sort that may and should be done. He were the depot and the Foresth Packing House is a vacant strip 50x400 feet that should also be converted into a park and lawn of the same sort as the one of which we are now so proud. Passongers who travel down over the bet plains during a cummer day would be agreeably surprised and refreshed to run into a depot surrounded by green grate plots, decorated with citrus and other trace and ornamental chrubs and lowers, which would make an indelible impression upon them.

The privilege to make these improvements could outside as the readily obtained, and the cost would be marely nominal, for the reason that a gardener and grandam is already amployed and the work required would call for no extra expenditure. The ground is leveled and in good condition for a top dressing of soil, and with this email expense the vicinity of the depot could be converted into a charming spot, that would appeak well for the taste and enterprise of Freeno. This engagestion is throw out to the enterprising basiness organizations of Freeno, with the hope that they may take the matter in hand and bring it to fruition without f

That the people of the San Josquin valley are loyal to their friends was demonstrated in an unmistakable manner yesterday,

demonstrated in an unmistakable manner yestexday.

Exactly one passenger occupied the three coaches that comprised the innegral local train of the Southern Pacific put on yesterday to run butween Stockton and Freeno in direct competition with the Valley road.

From the very beginning the Valley road has been patronized to an extent far beyond even the most sanguine expectations of its projectors. This has been true both in connection with passenger and fruight business.

The Southern Pacific convolved the idea of putting on a special train between Stockton and Frounc to run in connection with the Union Transportation Company's bests plying between San Francisco and Stockton. It was hoped this direct competition would be to some purpose. The new cervice was insugarated yesterday. But the people of the valley could not be seeved from their loyalty to their deliverer from the shackies of the Southern Pacific.

The three-elegant conclused the Huntington line carried one solitary passenger when it pulled out of Stockton. The daily average number of passengers carried by the Valley road le skry.

daily average number of passens ried by the Valley road is sixty.

New York Market.

New York August 17. — Leading operators made a rush to secure profits, with the result that wheat prices dropped 2 cents a bushel from last night, or 2% cents from the highest point of yesterday. The trade was loaded up with wheat, producing a topleasy condition readily exceptible to any adverse inhances.

The lact that English markets showed a weaker undertone this morning, therefore, created a big commotion among holders. Wheat began to noir into the pit from all directions. Reaching its greatest volume in the afternoon the selling pressure forced September down to 89%, it having sold at 91% shortly after the opening. At the decline Europpe was only a moderate buyer of wheat, taking about 10 loads at New York and outports, which last centribated to the great heavinese of the afternoon. Home crops news was builled, but was anable to offest the depressing foreign situation. Spring wheat advices were decidedly unfavorable. Local speculation was about half the volume of yesterday, sales reaching 5,425,000 knahols.
